

Lab on Packages and Classpath

- Use all the prior lab classes (*Product*, *Book*, *Software*, *ProductDB*, *ProductApp*, *Tagable*, *Validator* classes).
- The above mentioned classes should be placed appropriately in following packages:
 - '*main*' package should contain *ProductApp* class.
 - '*main.utility*' package should contain *Validator* class.
 - '*main.products*' package should contain *Product*, *Book*, *Software* classes.
 - '*main.products.db*' package should contain *ProductDB* class.
 - '*main.products.interfaces*' package should contain *Tagable* class.
- Based on the above classes placement, you may need to change the '*import*' statements.
- Set the '*classpath*', if necessary.
